Space

Are you aware of the rapid rise of man-made objects in the part of space nearest Earth, for example, the tens of thousands of satellites being launched in so-called "mega-constellations" by SpaceX, leading to pollution in space, the night sky, and the Earth's atmosphere?

Base (2129)

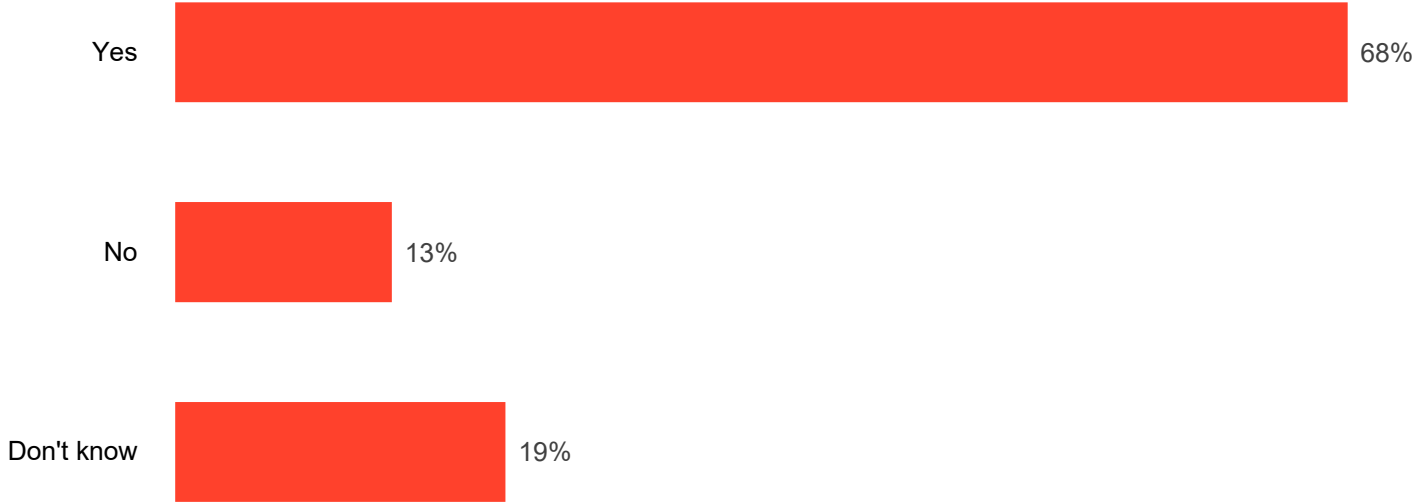

Space

Should your national government be doing more to prevent the rapid rise of pollution of space and the atmosphere caused by unregulated commercial activities in space by mega-constellations?

Base (2129)

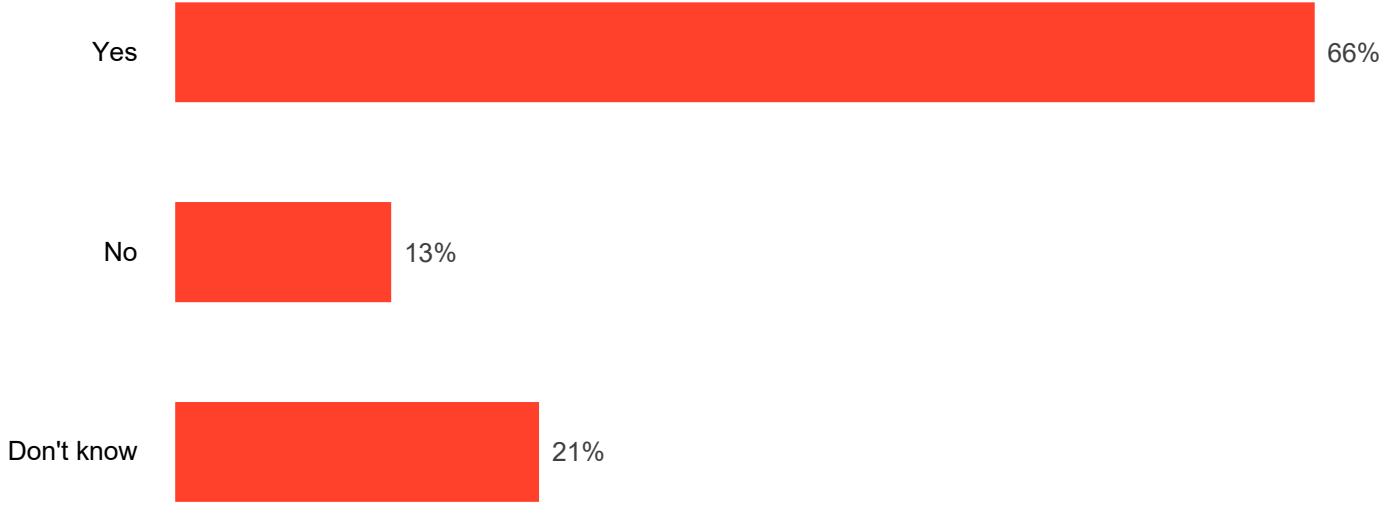

Space

Should the European Union do more to prevent the rapid rise of pollution of space and the atmospheric pollution by unregulated commercial activities in space by mega-constellations?

Base (2129)

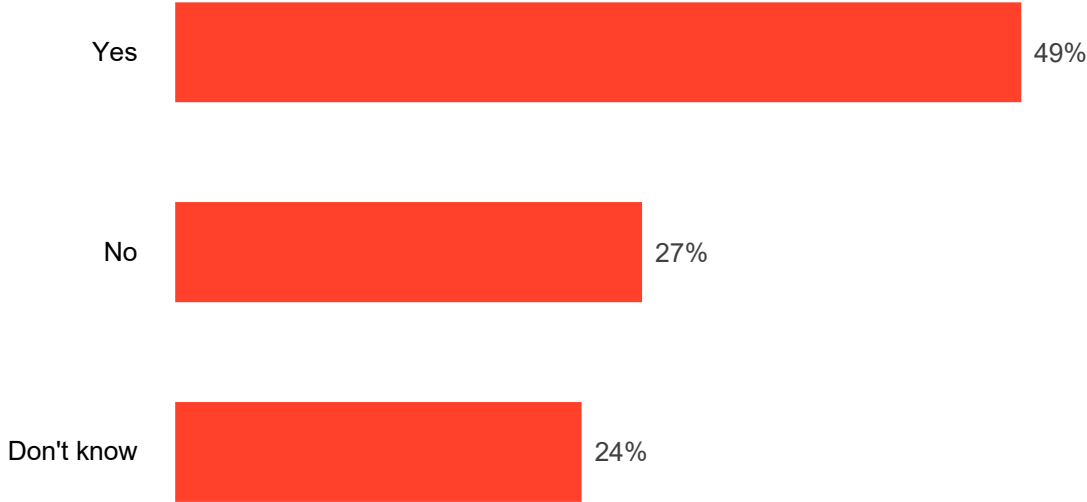

Space

Should governments create stronger rules and regulations to ensure human activity in space is sustainable?

Base (2129)

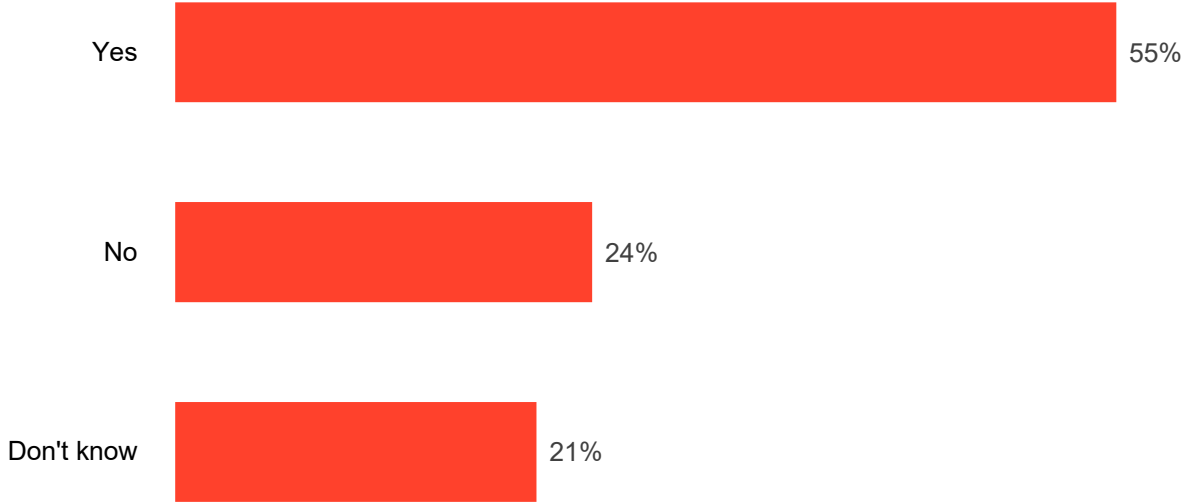

Space

In recent years, Elon Musk's Space X has started launching a satellite mega-constellation to provide Internet service and Jeff Bezos Amazon is getting ready to do the same. Are you concerned about a possible monopolization of space?

Base (2129)

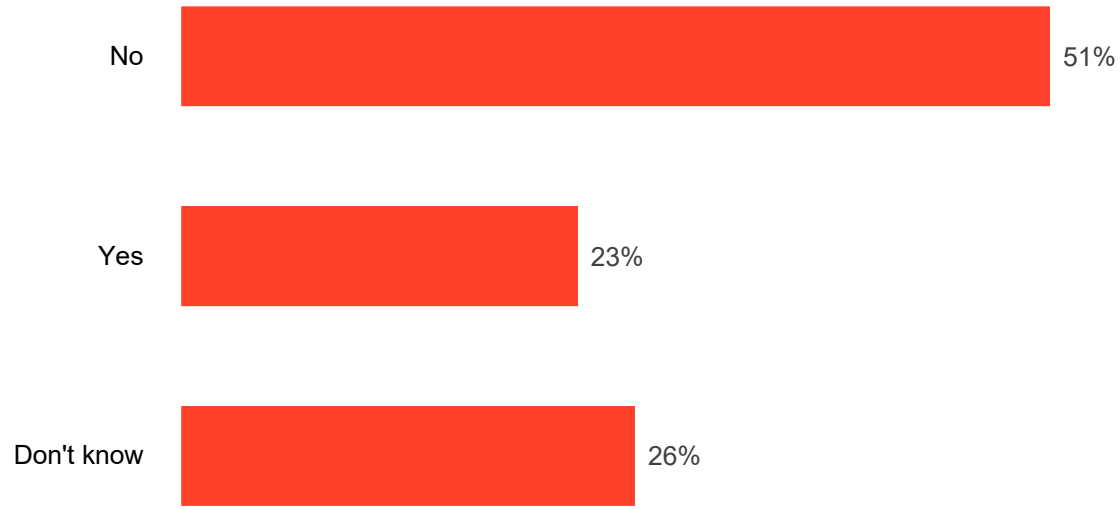

Space

Are you worried about the increasing light pollution in the night sky from manmade activities, forever affecting how the night sky appears to both stargazers and astronomers?

Base (2129)

Space

What is your opinion regarding the new commercial activities in space, do you see it as something beneficial to people, all things considered?

Base (2129)
